### Introduction

The Labor Market Information Unit of the Rhode Island Department of Labor and Training proudly presents:

#### A Decade of Change in Rhode Island

An Analysis of Private Sector Employment in the Ocean State 1992 - 2002

The past ten years have brought significant change to Rhode Island's economy. Between 1992 and 2002, nearly 43,700 private sector jobs have been added in the Ocean State, a 12.1 percent increase. Within the state, nearly all of the major economic sectors have contributed to this gain, led by Services and Retail Trade. However, Manufacturing employment has dipped considerably, losing more than 27 percent of its total sector employment during this period.

Regionally, Rhode Island has trailed its neighbors in employment growth. However, an analysis of short-term employment data shows that the Ocean State has fared the recent recession and subsequent period of economic stagnation better than other northeastern states to this point. Since 2000, private sector employment in the Ocean State (-641) has remained relatively unchanged. Although 2002 marked a turning point in Rhode Island's decade-long growth in private sector employment, each of the other New England states reported greater job losses on both a numerical and percentage basis between 2001 and 2002.

Using information collected by the Rhode Island Department of Labor and Training and the United States Department of Labor's Bureau of Labor Statistics, A Decade of Change in Rhode Island analyzes employment data and trends by industry on the statewide, county, and local levels. It also provides a snapshot of regional employment since 1992 and looks at what the future may hold for Rhode Island's workforce in the coming decade. This publication may be a useful tool in discovering how private industry employment in the Ocean State has changed over the past ten years... and where it may be headed during the coming decade.

## Overview: Rhode Island

Rhode Island's private sector has added nearly 43,700 jobs to the local economy since 1992, a 12.1 percent increase. Much of this gain came during the end of the 1990's as yearly percentage growth in total employment consistently surpassed 1.5 percent. The largest yearly increase was reported between 1999 and 2000, when 9,050 jobs were added to the local economy, a 2.3 percent increase. Total employment has since remained relatively stable, peaking in 2001 at 405,051 jobs statewide. Nationwide, private sector employment increased by 20.4 percent during the past decade, 8.3 percentage points higher than in Rhode Island.

Recent employment data shows that

the 2001 national recession and subsequent economic stagnation have begun to impact the Ocean State. In 2002, Rhode Island's private sector employers reported just over 404,000 jobs, 972 (-0.2%) fewer than the previous year. This loss marked the first employment decline since 1992.

Since 2002, the annual average private sector wage has risen steadily, recently surpassing the \$33,200 mark. These gains have come despite the loss of higher-wage Manufacturing jobs and the addition of lower-paying Services jobs. Yearly percentage increases in wages have not dipped below three percent since 1994, when workers averaged a 2.3

(+\$554) percent gain. The largest percentage increase occurred in 1998 as annual average wages jumped 5.4 (+\$1,473) percent. Annual gains have been somewhat smaller in recent years, increasing 3.1 (+\$978) percent in 2001 and 3.2 (+\$1,039) percent in 2002. Overall, the state's annual average private sector wage increased by 42.0 percent since 1992, on par with the national (+42.9%)average.

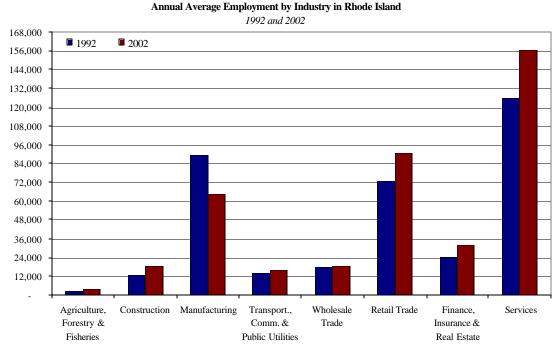

## Employment, 1992 - 2002

All but one of Rhode Island's major industry sectors reported overall employment gains between 1992 and 2002. During this period, a notable shift in employment concentration occurred, filling the vacuum created by the loss of thousands of Manufacturing jobs. Employers in the Services industries added 31,113 jobs during this period, a 24.7 percent increase.

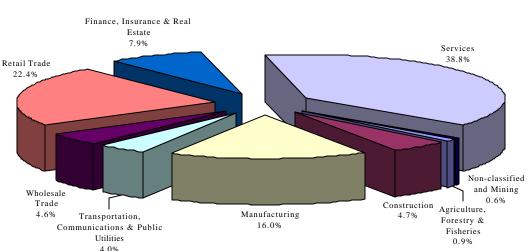

Services-related jobs now account for nearly 39 percent of total private sector employment within the Ocean State.

Retail Trade employment increased by 24.4 percent over the past decade, adding more than 17,700 jobs to the local economy. These gains have helped Retail Trade surpass Manufacturing as the second largest major industry sector in Rhode Island, accounting for 22.4 percent of total private sector employment in 2002.

Other notable employment gains occurred in Finance, Insurance & Real Estate (+7,358) and Construction (+6,743). Between 1992 and 2002, employment in these sectors increased by 30.2 percent and 55.2 percent, respectively.

Manufacturing was the only sector to report a decline in overall employment during this period, slashing 24,550 jobs, a 27.5 percent loss. In 1992, Manufacturing firms accounted for nearly 25 percent of the state's total private sector employment. By 2002, this share had fallen to 16 percent, making it the third largest sector in the Rhode Island economy.

## Employment in the

Between 1992 and 2002, New England's private sector employment increased by 15.8 percent (+800,066), trailing the national growth rate of 20.4 percent. During this period, each of the region's six states reported job gains. New Hampshire (+27.0%) and Vermont (+20.7) posted the largest percentage increases in private sector employment and outpaced the national rate, followed by Maine (+19.6%), Massachusetts (+17.8%), Rhode Island

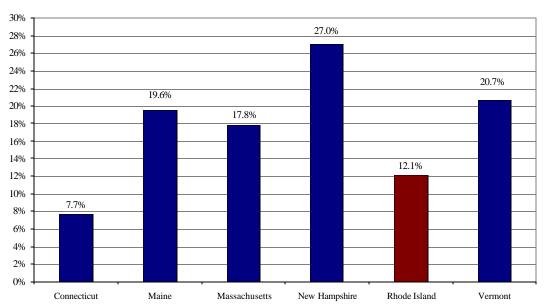

Annual A	Annual Average Employment in New England 1992 - 2002												
	<u>1992</u>	2002	Change	% Change									
Connecticut	1,308,612	1,409,970	101,358	7.7%									
Maine	412,147	492,792	80,645	19.6%									
Massachusetts	2,368,815	2,789,814	420,999	17.8%									
New Hampshire	410,429	521,442	111,013	27.0%									
<b>Rhode Island</b>	360,394	404,079	43,685	12.1%									
Vermont	204,210	246,576	42,366	20.7%									

(+12.1%) and Connecticut (+7.7%). By 2002, more than 47 percent of New England's total private sector employment was in Massachusetts, followed by Connecticut (24.0%), New Hampshire (8.9%), Maine (8.4%), Rhode Island (6.9%) and Vermont (4.2%).

Massachusetts, the region's largest employer, added 420,999 jobs between 1992 and 2002. This accounted for more than half (52.6%) of the total private sector job growth in New England during the period. New Hampshire (+111,013), Connecticut (+101,358), and Maine (+80,645) trailed the Bay State in total job gains, while Rhode Island's addition of 43,685 jobs was the area's second fewest, surpassing Vermont (+42,366). Despite these increases, New England's share of national employment declined 0.3 percentage points during the decade. By 2002, the region was home to 5.4 percent of all private sector jobs in the nation.

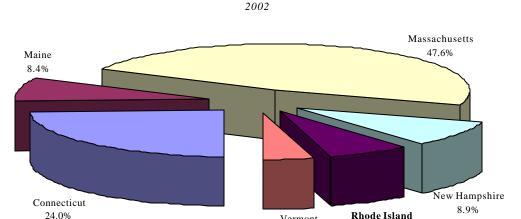

Although Rhode Island's job growth has lagged behind other New England states during the past decade, recent employment trends indicate the Ocean State has weathered the 2001 recession better than its neighbors. Between 2000 and 2001, the region's private sector employment declined by 0.5 percent, driven by job losses in Connecticut (-30,235) and Massachusetts (-4,551). The following year, New England's job loss (-109,882) more than tripled in size. Each of the region's states contributed to this 1.8 percent decline between 2001 and 2002.

#### Percent Change in Annual Average Private Sector Employment in New England 1992-2002

## New England States

While employment growth in the Ocean State trailed its regional neighbors during the final years of the 1990's, it also remained somewhat shielded by the job losses experienced throughout New England at the start of the new millennium. Between 2000 and 2001, employment in the border states of Connecticut and Massachusetts declined by -2.1 percent and -0.2 percent, respectively. Meanwhile, Rhode Island posted a small increase (+331) in jobs.

Vermont

4 2%

6.9%

Annual Average Private Employment in New England

Yet, the Ocean State was not immune to the 2001 recession and the stagnant economic period that followed it. Rhode Island reached a turning point in 2002, losing 972 (-0.2%) jobs over the year and ending a string of annual private sector employment gains dating back to 1992-1993. However, each of the other five New England states reported larger employment declines on both a numerical and percentage basis between 2001 and 2002. Massachusetts experienced the greatest job loss during that year, trimming 72,010 jobs, a 2.5 percent decline. To the west, Connecticut's private sector cut 20,353 (-1.4%) jobs, while the northern states of New Hampshire (-1.8%), Vermont (-1.4%) and Maine (-0.7%) reported significant job losses as well.

# Employment in Rhode

Each of Rhode Island's five counties reported employment growth between 1992 and 2002. Providence County, which accounts for more than 60 percent of total statewide employment, added 16,040 jobs during the period. Despite this large numerical gain, it reported the smallest percentage increase (7.0%) within the state. An additional 13,792 jobs were added in Kent County, whose 25.1 percent increase was the largest percentage gain among the five counties. Total private sector

Annual Average Employment in Rhode Island 1992-2002													
Rhode Island	1992 <b>360,394</b>	2002 <b>404,079</b>	<u>Change</u> <b>43,685</b>	% Change 12.1%									
Bristol County Kent County Newport County Providence County Washington County	10,182 55,013 25,269 229,267 30,433	11,755 68,805 30,672 245,307 37,183	1,573 13,792 5,403 16,040 6,750	15.4% 25.1% 21.4% 7.0% 22.2%									

employment in Washington County increased by 6,750 (22.2%) jobs, while the seaside communities of Newport County added 5,403 (+21.4%) jobs. Bristol County, Rhode Island's smallest, reported an additional 1,573 (15.4%) jobs.

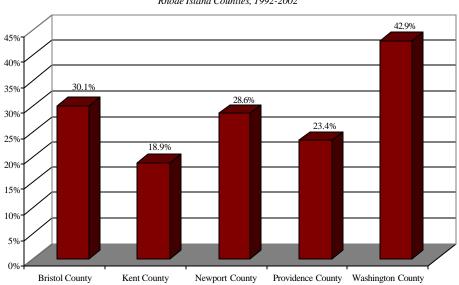

In Construction, Newport County doubled its sector employment between 1992 and 2002, adding more than 900 (+117.6%) jobs. Kent County nearly matched this feat, reporting a 91.3 (+1,477) percent increase in Construction employment during the period. Overall, Providence County reported the largest job gain (+4,764), while 700 (+70.3%) Construction jobs were added in Washington County.

During the past decade, growth in Retail Trade employment was spurred by Providence County's addition of nearly 8,900 (+23.4%) sector jobs. Notable county-wide gains were reported between 1998 and 1999 (+2,434) and between 1999 and 2000 (+2,203), partially reflecting the completion of the Providence Place Mall. Washington County (+42.9) reported the largest percentage increase in sector employment, 20% perhaps reflecting a population shift toward the state's southern communities. Of the ten Rhode Island localities with the 10% highest percentage growth in population between 1990 and 2000, seven were located in Washington County.

#### Percent Change in Annual Average Retail Trade Employment

Rhode Island Counties, 1992-2002

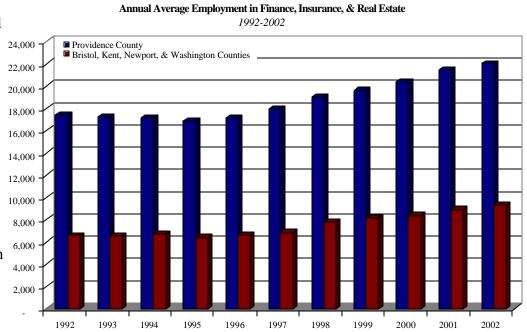

## Island's Five Counties

Providence County has long remained the primary source of Finance, Insurance, & Real Estate employment in Rhode Island. In 2002, more than 22,000 people worked in Providence County establishments engaged in these activities, accounting for 69 percent of the state's total employment within the sector. In comparison, just over 9,300 people were employed

Annual Average Employment in Finance Insurance & Real Estate

in Bristol, Kent, Newport, and Washington Counties combined. Since 1997, Providence County's Finance, Insurance, & Real Estate businesses have added in excess of 4,100 jobs to the local economy, concentrated in the communities of Lincoln (+2,280) and Smithfield (+1,589). County-wide employment gains have come despite significant job losses in the City of Providence, which has lost 2,192 jobs in this sector since 1992.

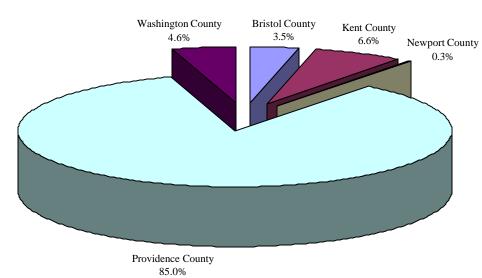

Since 1992, percentage gains in Services employment have been fairly consistent among Rhode Island's five counties. Bristol County reported the largest increase (+31.2%), followed by Kent (+29.6%) and Washington (+29.6%) Counties. Services employment in Providence County increased by 20,366 jobs during this period, while the other four counties combined to add more than 10,700 Services jobs to the local economy.

Statewide, Manufacturing was the only major sector to report a decline in total employment between 1992 and 2002. Each Ocean State county followed this trend, led by Providence County's loss of more than 20,800

#### Share of Manufacturing Employment Decline

Rhode Island Counties, 1992-2002

(-33.7%). Of Providence County's sixteen communities, seven lost in excess of 1.000 Manufacturing jobs during this period, including Providence (-7,719), Pawtucket (-4,424), and Woonsocket (-1,838). To the south, Kent County lost 1,628 (-13.2%) jobs, while Washington County's Manufacturing businesses cut 1,124 (-13.5%) jobs. Bristol County also reported a 25.4 (-863) percent decline in sector employment. Newport County's Manufacturing sector fared much better than that of its neighbors, losing just 67 jobs between 1992 and 2002, a 2.0 percent decline.

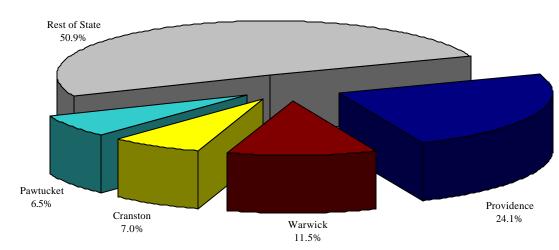

## Employment in Rhode

During the past decade, most of Rhode Island's thirty-nine communities experienced significant private sector job growth. Overall, thirty-three cities and towns reported gains in annual average employment between 1992 and 2002. On a numerical basis, Warwick (+7,734) and Cranston (+5,227) added the most jobs during this period, followed by Smithfield (+3,850), Lincoln (+3,598), and East Providence (+2,495). Providence, the state capital, added 1,356 jobs over the decade, but has shed more than 4,700 jobs since its local private sector employment peaked at 102,111 jobs in 2000.

Rhode Island's private sector jobs remain concentrated in its four most populated communities -- Providence, Warwick, Cranston, and Pawtucket. Together, the four cities accounted for an estimated 39.1 percent of the Ocean State's population\* and nearly half (49.1%) of Rhode Island's private sector employment in 2002.

However, growth rates during the past ten years signify a slight shift in employment from the state's urban cities to its rural towns. Led by West Greenwich (+369.6%), many of Rhode Island's rural communities reported high levels of percentage growth in private sector employment between 1992 and 2002. Jamestown (+95.8%),

#### **Annual Average Employment in Rhode Island, 2002**

Richmond (+72.8%), Smithfield (+56.5%), and Tiverton (56.5%) also experienced above average rates of job growth. Meanwhile, Providence experienced an anemic 1.4 percent increase in growth, while other large communities, such as Cranston (+22.5%), Warwick (+20.0%), and East Providence (+13.4%), fared somewhat better.

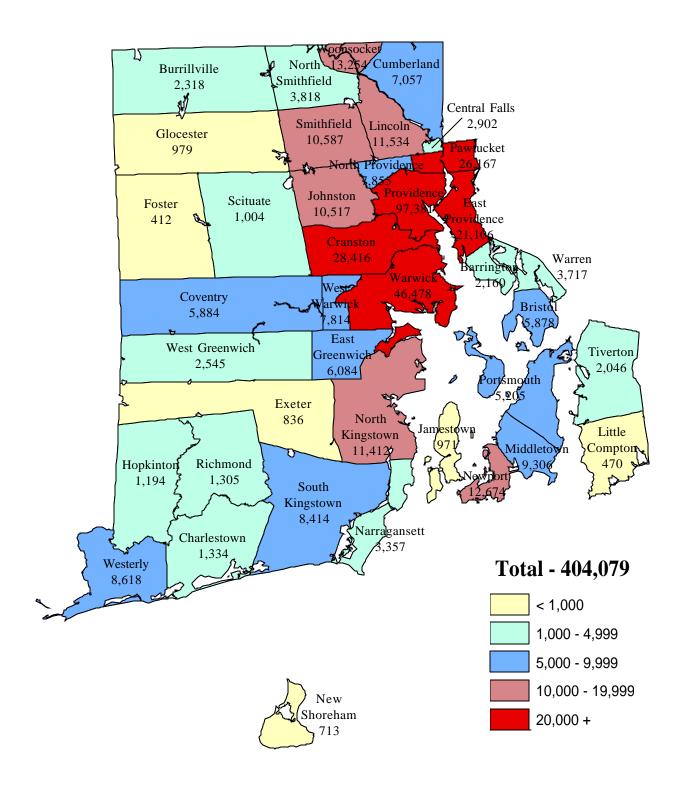

Six Ocean State communities lost employment during the past decade, including Pawtucket (-3,229), Central Falls (-1,569), and Woonsocket (-737). Smaller declines were reported in the towns of Warren (-186), North Providence (-162), and Little Compton (-18). On a percentage basis, the annual average employment declines in Central Falls (-35.1%) and Pawtucket (-11.0%) were significant, followed by smaller losses in Woonsocket (-5.3%) and Warren (-4.8%).

Between 1992 and 2002, twenty-two of Rhode Island's thirty-nine communities reported percentage wage gains in excess of the state average. The annual average wage in West Greenwich (+171.4%) more than doubled during this period, while New Shoreham (+74.3%), Middletown (+71.6%), and Smithfield (+71.1%) also reported significant increases. On a dollar basis, the average wage paid in West Greenwich increased by more than \$44,600, by far the largest increase measured. Other notable gains occurred in Smithfield (+\$15,057), Middletown (+\$14,071), Johnston (+\$13,855), and Lincoln (+\$13,076). The smallest percentage wage gains were reported by private sector workers in Foster (+16.5%), Coventry (+19.6%), and Portsmouth (+23.0%).

<sup>\*</sup> Calculated based on state and local population estimates (for July 1, 2002) by the U.S. Census Bureau, Population Division.

## Island's Cities & Towns

### Annual Average Employment, 2002

# Agriculture, Forestry, & Fisheries

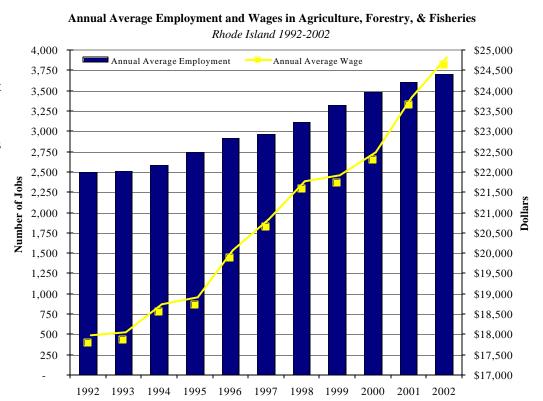

Agriculture, Forestry, & Fisheries is one of Rhode Island's smallest sectors, accounting for less than one percent of annual average employment in 2002. In that year, just over 3,700 people worked for establishments engaged in such activities as raising crops and livestock, dairy farming, and commercial fishing. The sector also includes firms providing landscape and veterinary services. The 2002 employment level represented a 48 percent increase over the 2,500 people working in this sector ten years earlier.

Warwick establishments continued to employ the most Agriculture, Forestry, & Fisheries workers of any Ocean State community, reporting 408 jobs in 2002. This represented a gain of 114 jobs since 1992, a 38.8 percent increase. The largest employment increase occurred in East Greenwich, which added 126 jobs to the local economy during this period. Johnston (+105) was the only other community to add more than 100 jobs within this sector between 1992 and 2002.

Several localities managed to double the number of Agriculture, Forestry, & Fisheries jobs within their borders since 1992, including Cumberland (+60), Hopkinton (+39), Narragansett (+39), West Greenwich (+36), and West Warwick (+30). While these communities experienced significant percentage gains in employment, the absolute number of jobs added remained relatively small.

Several cities and towns reported a decline in sector employment over the decade. East Providence lost half of its Agriculture, Forestry, & Fisheries jobs, falling from 109 jobs in 1992 to just 55 jobs in 2002. Small levels of employment decline were also reported in Woonsocket (-10), Burrillville (-7), and Middletown (-4).

In 2002, the annual average wage paid to Rhode Island's Agriculture, Forestry, & Fisheries employees stood at \$24,620, a 38.4 (+\$6,832) percent increase over the 1992 wage of \$17,788. This average approximately equals three-fourths of the annual average wage paid to all private sector employees in the Ocean State. Overall. establishments within this sector paid \$91.1 million in total wages in 2002, accounting for less than one percent (0.7%) of all private sector wages paid throughout the state in that year.

#### **Quick Facts**

Employment Change - Sector employment increased by 1,200 (+48.0%) jobs between 1992 and 2002.

Wage Change - Sector wages increased by \$6,832 (+38.4%) between 1992 and 2002.

Job Gains - The largest sector gains were reported in East Greenwich, Warwick, and Johnston.

Job Losses - Sector losses were reported in East Providence, Woonsocket, and Burrillville.

Highest Employment - Sector employment in 2002 was highest in Warwick, Johnston, and South Kingstown.

### Construction

Between 1992 and 2002, Rhode Island's Construction firms added 6,743 jobs to the local economy. This 55.2 percent employment increase was the largest percentage gain reported among the major sectors during this period. By 2002, nearly 19,000 people worked in Construction-related industries within the Ocean State, accounting for 4.7 percent of total statewide private sector employment. Many of these jobs were in the General Building Contractors-Residential Buildings, Plumbing, Heating & Air-Conditioning, and Miscellaneous Special Trade Contractors (i.e. Glass & Glazing, Excavation, Wrecking & Demolition) industries.

Annual growth rates in Construction employment have slowed in recent years and contrast the notable job gains reported during the late-1990's. The largest annual gain occurred between 1998 and 1999, as employers increased their payrolls by nearly 2,000 jobs, a remarkable 12.4 percent growth in employment. Providence accounted for a significant portion of this growth, likely associated with the building of the Providence Place Mall. In the preceding year, 1,194 (+8.2%) jobs were added to the local economy. Annual job growth in excess of three percent was also reported in 1994 (+4.7%), 1996 (+3.9%), and 1997 (+4.7%). In contrast, Construction firms added just 282 (+1.5%) jobs in 2001. One year later, an increase of 344 jobs was reported, a 1.8 percent growth in employment.

Each of Rhode Island's thirty-nine communities reported increased Construction employment between 1992 and 2002. Providence (+1,143) added the most jobs during this period, followed by Warwick (+753), Cranston (+610), and Pawtucket (+599). Several other cities and towns doubled (or even tripled) their sector employment levels, including Johnston (+568), Cumberland (+503), Portsmouth (+449), and Coventry (+288).

On average, employees working in Construction industries earned \$41,385 in 2002, \$8,159 more than the state's total private sector average. This represented a 41.1 percent increase over the sector's 1992 wage of \$29,321. Overall, sector establishments paid their employees \$784.9 million in total wages in 2002, accounting for 5.8 percent of all private sector wages paid throughout the Ocean State that year.

#### **Quick Facts**

Employment Change - Sector employment increased by 6,743 (+55.2%) jobs between 1992 and 2002.

Wage Change - Sector wages increased by \$12,064 (+41.1%) between 1992 and 2002.

Job Gains - The largest sector gains were reported in Providence, Warwick, and Cranston.

Highest Employment - Sector employment in 2002 was highest in Providence, Warwick, and Cranston.

## Manufacturing

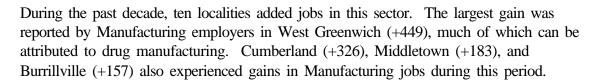

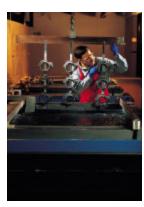

Manufacturing was the only major sector to report an overall decline in annual average employment throughout the state between 1992 and 2002. Ten years ago, more than 89,300 people worked in Rhode Island's Manufacturing industries, including Jewelry, Silverware & Plated Ware, Ship & Boat Building & Repairing, Metalworking Machinery & Equipment, and Electric Lighting & Wiring Equipment. By 2002, sector employment had fallen 27.5 percent to just under 64,800 jobs.

Two-thirds of all Ocean State communities reported job losses in Manufacturing during this period, with eight cities and towns experiencing declines in excess of 1,000 jobs. This list includes Providence (-7,719), Pawtucket (-4,424), Woonsocket (-1,838), Central Falls (-1,401), Cranston (-1,123), East Providence (-1,119), North Kingstown (-1,090), and

North Providence (-1,044). Other notable losses occurred in Coventry (-917), Johnston (-844), Warren (-736), and Smithfield (-736).

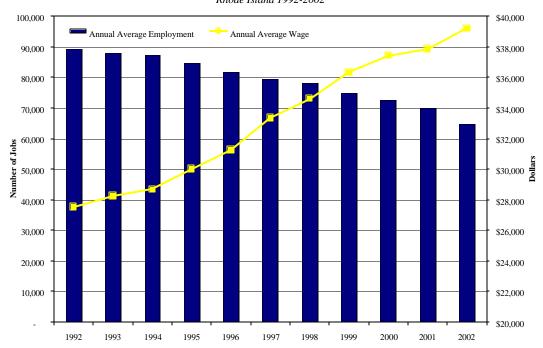

On a percentage basis, Barrington (-77.2%), North Providence (-60.1%), Central Falls (-54.0%), and Glocester (-50.0%) lost more than half of their private sector Manufacturing jobs between 1992 and 2002. Woonsocket (-49.5%), North Smithfield (-47.9%), and Coventry (-47.8%) also reported sizeable percentage declines in sector employment during this period.

Despite the significant loss of employment, Manufacturing's annual average wage has grown at a slightly faster rate than the state's private sector average. Between 1992 and 2002, Manufacturing's average wage rose from \$27,521 to \$39,230, a 42.5 percent increase. Overall, employers in this sector paid wages in excess of \$2.5 billion in 2002. This represented the second highest total (by major sector) that year, trailing only Services (\$5.1 billion).

#### **Quick Facts**

Employment Change - Sector employment decreased by 24,550 (-27.5%) jobs between 1992 and 2002.

Wage Change - Sector wages increased by \$11,709 (+42.5%) between 1992 and 2002.

Job Gains - The largest sector gains were reported in West Greenwich, Cumberland, and Middletown.

Job Losses - The largest sector losses were reported in Providence, Pawtucket, and Woonsocket.

Highest Employment - Sector employment in 2002 was highest in Providence, Pawtucket, and Cranston.

# Transportation, Communications, & Public Utilities

significant gains as well.

Between 1992 and 2002, Rhode Island's Transportation, Communications, & Public Utilities employers added 1,735 jobs to the local economy, a 12.0 percent increase. By 2002, 16,158 people worked in industries such as Trucking & Courier Services, School Bus Transportation, Water Transportation Services, Telephone Communications, and Electric Services, accounting for 4.0 percent of total statewide private sector employment. However, this level was down from a peak of 16,761 jobs one year earlier.

Warwick has more than doubled its sector employment during the past decade, adding 1,668 Transportation, Communications, & Public Utilities jobs since 2002, followed by Pawtucket (+535), West Warwick (+509), and Cranston (+474). Four other Ocean State communities reported triple-digit gains, including Newport (+315), Johnston (+307), North Kingstown (+127), and Charlestown (+110). On a percentage basis, small job gains in Charlestown (+440.0%), Hopkinton (+242.9%), and Scituate (+178.9%) generated notable percentage increases in local Transportation, Communications, & Public Utilities employment. Sector employers in the urban communities of West Warwick (+169.1%) and Warwick (+139.7%) generated

Eleven of Rhode Island's thirty-nine communities reported job losses in their Transportation, Communications, & Public Utilities industries during this period, led by Providence (-1,071) and East Providence (-824). Several smaller localities, such as Richmond (-90) and Westerly (-73), experienced a similar trend. The large decline in Middletown is the result of an industry coding change and is not indicative of the community's Transportation, Communications, & Public Utilities employment trend, which has been on the rise since 1993.

In 2002, Transportation, Communications, & Public Utility workers in the Ocean State earned an annual average wage of \$38,821, up more than \$10,000 from its 1992 level. However, this 35.0 percent increase was the smallest percentage gain reported among the major sectors during this period. Overall, sector employers paid more than \$627.3 million in total wages in 2002, accounting for 4.7 percent of private sector wages statewide.

#### **Quick Facts**

Employment Change - Sector employment increased by 1,735 (+12.0%) jobs between 1992 and 2002.

Wage Change - Sector wages increased by \$10,074 (+35.0%) between 1992 and 2002.

Job Gains - The largest sector gains were reported in Warwick, Pawtucket, and West Warwick.

Job Losses - The largest sector losses were reported in Providence, East Providence, and Richmond.

Highest Employment - Sector employment in 2002 was highest in Providence, Warwick, and Pawtucket.

### Wholesale Trade

Rhode Island's Wholesale Trade employment has remained relatively stagnant during the past decade, adding 811 jobs between 1992 and 2002. This 4.5 percent increase was the smallest reported among the major sectors during this period. By 2002, workers engaged in the wholesale of durable (such as Motor Vehicles, Furniture, and Electrical Goods) and non-durable (such as Apparel, Groceries, and Chemicals) goods accounted for 4.6 percent of total statewide private sector employment.

Between 1992 and 2002, fourteen Ocean State communities reported triple-digit gains in Wholesale Trade jobs, including East Providence (+443), Warwick (+404), South Kingstown (+390), Smithfield (+322), and North Kingstown (+268). Several cities and towns, such as East Greenwich (+248), West Warwick (+239), and West Greenwich (+232), more than doubled their sector employment levels during this period. On a percentage basis, the largest gains occurred in West Greenwich (+2,900%), Warren (+814.3%), and South Kingstown (+253.2%).

Several localities experienced total job losses in Wholesale Trade since 1992, including Pawtucket (-815), North Providence (-176), and Narragansett (-173). These three localities also reported the largest percentage declines in the Ocean State (-49.8%, -51.6%, and -55.1%, respectively), followed by Westerly (-28.6%) and North Smithfield (-20.6%).

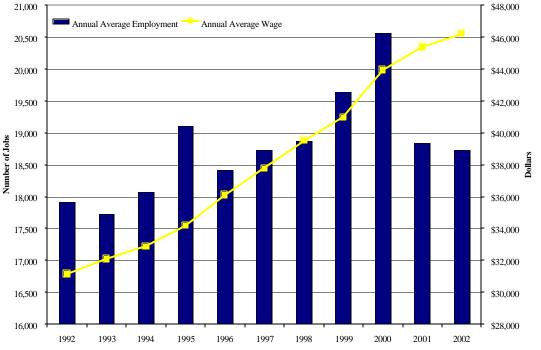

Wholesale Trade employers paid their workers an annual average wage of \$46,225 in 2002, up 48.4 percent from the 1992 average of \$31,145 and \$13,000 more than the state's 2002 private sector average of \$33,226. This \$15,080 gain was the second largest increase (both numerically and on a percentage basis) among the major sectors, trailing only Finance, Insurance, & Real Estate. By the end of this period, Rhode Island's Wholesale Trade

establishments combined to pay nearly \$866 million in annual wages, accounting for 6.5 percent of total private sector wages paid in 2002.

\* The large employment decline reported in Wholesale Trade between 2000 and 2001 (primarily in Providence and Cranston) partially resulted from coding changes associated with the conversion from the Standard Industrial Classification (SIC) system to the North American Industry Classification System (NAICS). For more information regarding this conversion, please visit: www.dlt.ri.gov/lmi/es202/naics/naics.htm.

#### **Quick Facts**

Employment Change - Sector employment increased by 811 (+4.5%) jobs between 1992 and 2002.

Wage Change - Sector wages increased by \$15,080 (+48.4%) between 1992 and 2002.

Job Gains - The largest sector gains were reported in East Providence, Warwick, and South Kingstown.

Job Losses - The largest sector losses were reported in Pawtucket, North Providence, and Narragansett.

Highest Employment - Sector employment in 2002 was highest in Providence, East Providence, and Cranston.

## Retail Trade

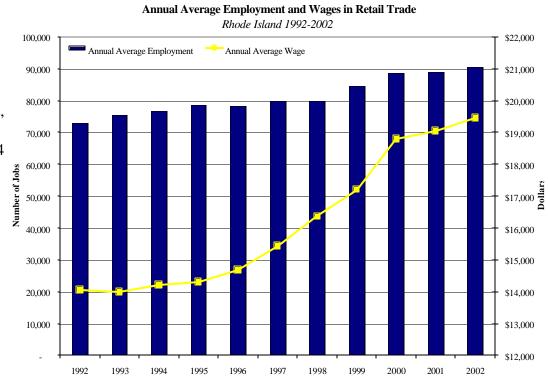

More than 17,700 Retail Trade jobs have been added to the local economy since 1992, a 24.4 percent gain. In 2002, sector employment totaled 90,646 jobs in industries such as Motor Vehicle Dealers, Grocery Stores, Department Stores, and Eating & Drinking Places. This growth has made Retail Trade businesses the second largest employer in Rhode Island's private sector, surpassing Manufacturing in 1997 and trailing only Services.

Thirty percent of the state's total Retail Trade employment is located in two communities - Providence and Warwick. In 1992, Warwick firms reported more than 11,700 jobs compared to Providence's 8,900. Since that time, Providence has surpassed its southern neighbor as the Ocean State's leading Retail Trade employer, adding 5,715 (+64.3%) jobs between 1992 and 2002. The addition of the Providence Place Mall during the late 1990's likely accounts for a significant portion of this increase. During this same period, Warwick added 1,249 jobs, a 10.6 percent increase.

Several other communities experienced significant job growth in local Retail Trade employment, including Smithfield (+1,519), North Kingstown (+1,349), Cranston (+1,130), Coventry (+996), and Middletown (+736). On a percentage basis, Rhode Island's rural communities of Exeter (+150.0%), North Smithfield (+136.1%), Richmond (+120.6%), and West Greenwich (+117.4%) posted the largest gains between 1992 and 2002. Interestingly, between 1990 and 2000, West Greenwich (1st), Richmond (2nd), and Exeter (9th) were also three of the fast growing communities by population within the Ocean State.

Since 1992, seven cities and towns have reported overall job losses in Retail Trade, led by Pawtucket (-1,038) which lost more than 21 percent of its Retail Trade jobs. Smaller declines occurred in North Providence (-136), Little Compton (-74), Lincoln (-50), and Scituate (-30).

Due to the sector's parttime and seasonal nature. Retail Trade employees have consistently earned the lowest annual average wage in the state. In 2002, workers were paid \$19,465 on average, a 38.4 percent increase over the 1992 average. Overall, Retail Trade businesses paid more than \$1.76 billion in total wages to their workers in 2002. This was the third largest total among the sectors, accounting for 13.1 percent of all private sector wages paid in Rhode Island that year.

#### **Quick Facts**

Employment Change - Sector employment increased by 17,759 (+24.4%) jobs between 1992 and 2002.

Wage Change - Sector wages increased by \$5,405 (+38.4%) between 1992 and 2002.

Job Gains - The largest sector gains were reported in Providence, Smithfield, and North Kingstown.

Job Losses - The largest sector losses were reported in Pawtucket, North Providence, and Little Compton.

Highest Employment - Sector employment in 2002 was highest in Providence, Warwick, and Cranston.

# Finance, Insurance, & Real Estate

Rhode Island's Finance, Insurance, & Real Estate sector has reported significant statewide employment growth during the past decade, adding 7,358 jobs to the economy between 1992 and 2002. By the end of this period, more than 31,700 people were employed in industries such as Fire, Marine, & Casualty Insurance, Mortgage Bankers & Brokers, and Real Estate Agents & Managers. Much of this growth has come since the late 1990's as several large companies have established or expanded their presence within the Ocean State.

Many of the Ocean State's thirty-nine communities reported an increase in Finance, Insurance, & Real Estate employment during this period. Four cities and towns added more than 1,000 jobs apiece, including Lincoln (+2,440), Warwick (+1,763), Smithfield (+1,555), and East Providence (+1,495). Warwick's job gains amounted

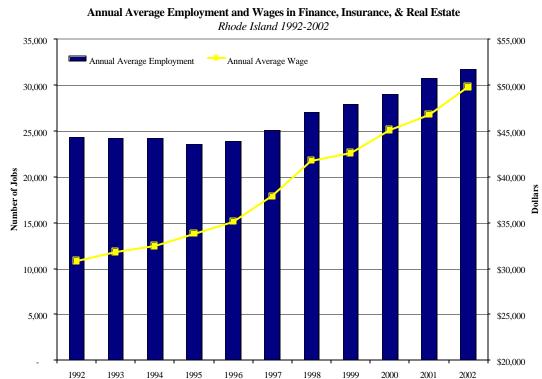

to a 52.4 percent increase in sector employment, while the other three localities more than doubled their levels. In Smithfield, the establishment and expansion of a large security broker and dealer firm accounts for most of the town's employment gain since 1998. Several other communities, such as Cranston (+860), East Greenwich (+362), and Johnston (+222), also reported notable increases in their private sector Finance, Insurance, & Real Estate employment levels.

Providence was the only community to report a notable decline in Finance, Insurance, & Real Estate employment during this period, losing 2,192 jobs between 1992 and 2002.

Much of this 19.3 percent loss can be attributed to a large insurance firm moving northward to Lincoln during the late 1990's. An additional six communities reported a small number of job losses in their

to Lincoln during the late 1990's. An additional six communities reported a small number of job losses in their Finance, Insurance, & Real Estate industries, including Coventry (-25), Glocester (-22), and Jamestown (-14).

Workers in Rhode Island's Finance, Insurance, & Real Estate industries earned the highest annual wage by sector in 2002, averaging \$49,786 per employee. This represented a remarkable 61.5 percent increase over the 1992 annual wage of \$30,829, also the largest percentage gain in the private sector. Overall, firms in this sector paid more than \$1.58 billion in wages in 2002, accounting for 11.8 percent of the private sector total that year.

#### **Quick Facts**

Employment Change - Sector employment increased by 7,358 (+30.2%) jobs between 1992 and 2002.

Wage Change - Sector wages increased by \$18,957 (+61.5%) between 1992 and 2002.

Job Gains - The largest sector gains were reported in Lincoln, Warwick, and Smithfield.

Job Losses - The largest sector losses were reported in Providence, Coventry, and Glocester.

Highest Employment - Sector employment in 2002 was highest in Providence, Warwick, and Lincoln.

## Services

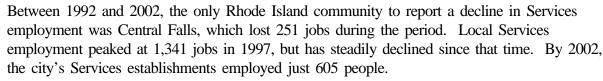

Between 1992 and 2002, Services establishments in the Ocean State added 31,113 jobs to the local economy, a 24.7 percent increase. By the end of this period, more than 156,800 people were employed in this sector, accounting for 38.8 percent of total private sector employment in Rhode Island. Services includes firms engaged in a variety of industries, such as Hotels & Lodging Places, Amusement & Recreation, Health, Personnel Supply, Automotive Repair, Legal, Private Education, and Private Households.

All but one of the state's thirty-nine communities reported job gains in Services during the past decade, led by Providence (+7,531), Cranston (+3,145), East Providence (+2,479), Warwick (+2,117), and Pawtucket (+1,937). Four other towns posted increases in excess of

1,000 jobs during this period, including Lincoln (+1,172), Middletown (+1,171), Johnston (+1,088), and South Kingstown (+1,002).

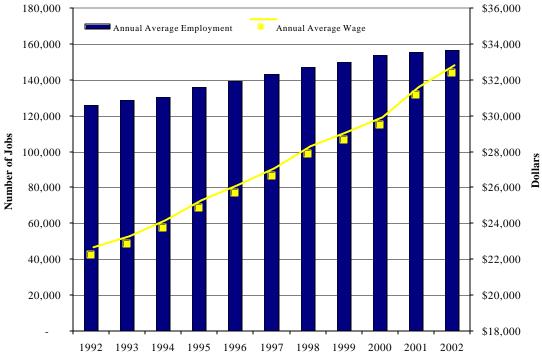

On a percentage basis, several small localities reported notable gains. West Greenwich's addition of 995 Services jobs during this period was nearly a 900 percent increase, mostly attributable to a large Computer Systems firm. Richmond (+301.5%) and Jamestown (+125.3%) also succeeded in doubling their Services employment levels during the past decade.

Rhode Island's Services employees earned an annual average wage of \$32,390 in 2002, more than \$800 less than the state's average private sector wage that year. However, this wage did represent a 45.6 percent increase over its 1992 average (\$22,239), the third highest percentage increase among the major sectors. By the end of increase over its 1992 sectors. By the end of this period, Services establishments accounted for 37.8 percent (\$5.08 billion) of total private sector wages in the Ocean State.

#### **Annual Average Wages by Industry**

Rhode Island, 2002

# Annual Average Private Sector Wages 2002

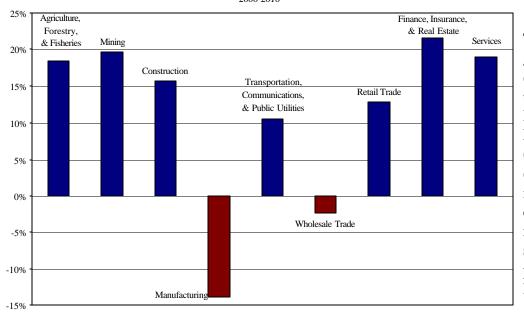

## A Look Ahead...

Based on our latest projections data, Rhode Island's private and public sectors are expected to add more than 50,000 jobs between 2000 and 2010, a ten percent increase. Job growth is anticipated in nearly all major industrial sectors of the economy, with the largest gains occurring in Services (+35,678), Retail Trade (+11,358), and Finance, Insurance, & Real Estate (+6,255). Statewide employment levels in both Manufacturing (-9,953) and Wholesale Trade (-483) are projected to decline during the next ten years.

#### By Industry...

Within Services (+35,678), three-quarters of the sector's job growth is expected in Health Services (+10,533), Educational Services (+7,447), Business Services (+4,416), and Social Services (+4,389). This is due, in part, to projected increases in Hospitals and Nursing & Personal Care Facilities; Elementary & Secondary Schools and College & Universities; Computer & Data Processing Services and Personnel Supply Services; and Residential Care and Child Day Care Services. Overall, it is estimated that Services employment in Rhode Island will increase by 19.0 percent between 2000 and 2010.

#### Projected Employment Growth in Rhode Island 2000-2010

The projected 12.8 percent growth in Retail Trade (+11,358) employment is likely to be concentrated in Eating & Drinking Places (+4,175), Miscellaneous Retail Stores (+2,187), and Food Stores (+1,343). These three industries should account for over two-thirds of the sector's new jobs during this period, solidifying Retail Trade's position as the state's second largest employer by sector.

One of Rhode Island's fastest growing sectors during the past ten years, Finance, Insurance, & Real Estate (+6,255) employment is expected to rise by more than 21 percent over the decade. This represents the largest projected percentage increase among the major sectors for this period. It is anticipated that Security & Commodity Brokers (+1,815), Insurance Carriers (+1,496), and Real Estate (+1,051) firms will post notable job gains, while the sector's largest industry, Depository Institutions, is expected to increase its employment level by just 8.0 (+719) percent.

Industry projection data for Services includes Government Education and Hospital employment. Post Office employment is included in the Transportation, Communications, & Public Utilities sector. Employment figures listed elsewhere in this publication are based upon private Covered Employment and Wage data, which excludes Government employment. For this reason, it is not possible to directly compare these two statistical data sets. For more information regarding Industry & Occupational Projections, please visit www.dlt.ri.gov/lmi/proj.htm.

# Rhode Island Employment Projections, 2000-2010

Construction, which reported the largest percentage increase in sector employment between 1992 and 2002, is expected to add 2,882 (+15.7%) jobs by 2010. Most of this increase is projected to occur in Special Trade Contractors (+2,189), the sector's largest industry. Smaller levels of job growth are also projected in the state's Transportation, Communications, & Public Utilities (+2,187) and Agriculture, Forestry, & Fisheries (+645) sectors. These gains represent percentage increases of 10.5 percent and 18.5 percent, respectively.

Mirroring national patterns, Manufacturing firms in the Ocean State are projected to trim their payrolls by nearly 10,000 jobs by 2010, a 13.9 percent decrease. Nearly all industry groups are projected to decline with the largest losses occurring in Fabricated Metal Products (-1,915), Textiles (-1,676), Miscellaneous Manufacturing (-1,321), Industrial Machinery & Equipment (-1,157), and Primary Metals (-1,145). Each of these industries is expected to post double-digit percentage losses. Small levels of job growth are anticipated in Transportation Equipment (+834), Chemicals & Allied Products (+380), and Food & Kindred Products (+116).

Just under 500 Wholesale Trade jobs are also expected to be lost by 2010. This 2.3 percent decline is projected to occur exclusively within the sector's Durable Goods (-734) industry.

Rhode Island Employment Projections by Sector, 2000-2010									
	<u>2000</u>	<u>2010</u>	<u>Change</u>	% Change					
Total	440,625	489,238	48,613	11.0%					
Agriculture, Forestry, & Fisheries	3,479	4,124	645	18.5%					
Mining	223	267	44	19.7%					
Construction	18,339	21,221	2,882	15.7%					
Manufacturing	71,858	61,905	(9,953)	-13.9%					
Transport., Comm., & Public Utilities	20,810	22,997	2,187	10.5%					
Wholesale Trade	20,571	20,088	(483)	-2.3%					
Retail Trade	88,697	100,055	11,358	12.8%					
Finance, Insurance, & Real Estate	29,046	35,301	6,255	21.5%					
Services	187,602	223,280	35,678	19.0%					

#### By Occupation...

Employment in Rhode Island is projected to grow at all education and skill levels, from jobs requiring on-the-job training to those requiring advanced degrees. Job openings result from the need to replace workers who leave an occupation and to fill vacancies created by business expansion. During the projection period, it is expected that employers will need to find workers to fill over 171,000 job openings. Nearly 30 percent of the job openings are attributed to the economic growth that is expected to occur during this period. The remaining job openings are due to employee turnover, which is usually highest among jobs with low pay and minimal training requirements. These jobs generally attract a higher proportion of young and part-time workers.

# Rhode Island Employment Projections, 2000-2010 continued...

Among the major occupational groups, the highest growth rates are expected in Computer & Mathematical occupations (+41.1%), Community & Social Services occupations (+23.5%), Education, Training & Library occupations (+23.6%), Healthcare Practitioners & Technical occupations (+20.6%), Healthcare Support occupations (+21.8%), and Personal Care & Service occupations (+20.6%). The major occupational groups with the greatest number of expected job openings are Food Preparation & Serving Related occupations (+24,983), Sales & Related occupations (+21,677), and Office & Administrative Support occupations (+21,677).

Occupational decline results from declining industry employment and from technological change. Among the occupations with the largest annual average declines are Assemblers, First Line Supervisors/Managers of Productions & Operating Workers, Word Processors & Typists, Bookkeeping, Accounting & Auditing Clerks, and Secretaries (expect Legal or Medical). It is important to note that while these jobs are not expected to create openings due to growth, there will still be a demand for workers in these occupations resulting from the need to replace workers who leave their jobs.

#### High Demand...

Occupations with the greatest number of annual openings represent numerous opportunities for finding employment in the years ahead. It is projected that during the 2000-2010 period, employers will need to fill over 17,000 jobs each year resulting from employee turnover and economic growth. Several Services-related occupations top the Ocean State's list of "high demand" occupations, including Retail Salespersons (770 annual openings), Waiters & Waitresses (703), Combined Food Preparation & Serving Workers, Including Fast Food (700), and Cashiers (644). Registered Nurses (527) and Nursing Aides, Orderlies & Attendants (278) will also be in need during the coming decade, as will be Teaching Assistants (271). Rounding out Rhode Island's top ten "high demand" occupations are Customer Service Representatives (260), Counter Attendants, Cafeteria, Food Concession & Coffee Shop (260), and Office Clerks, General (249).

#### Fastest Growing Occupations...

The fastest growing occupations in Rhode Island are those with a projected 2010 employment level of 500 or more and a growth rate of at least 20.0 percent, twice the average for all occupations:

Rhode Island's Top 10 Fastest Growing Occupations, 2000-2010									
Occupational Title	Growth Rate	Training Requirements							
Computer Support Specialists	68.3%	Associate degree							
Computer Software Engineers, Applications	59.5%	Bachelor's degree							
Personal Financial Advisors	58.5%	Bachelor's degree							
Network and Computer Systems Administrators	54.3%	Bachelor's degree							
Hotel, Motel, and Resort Desk Clerks	47.3%	Short-term on-the-job training							
Special Edu. Teachers-Preschool, Kindergarten, & Elementary	46.7%	Bachelor's degree							
Social and Human Service Assistants	46.5%	Moderate-term on-the-job training							
Medical Assistants	45.8%	Moderate-term on-the-job training							
Computer Software Engineers, Systems Software	41.2%	Bachelor's degree							
Amusement and Recreation Attendants	40.7%	Short-term on-the-job training							

### LMI Stat Track

#### Convenient. Informational. Fast.

LMI Stat Track is a periodic electronic newsletter delivered to our valued customers, containing hyperlinks to current labor market data, announcements regarding publications, and updates to the LMI web site. Our goal is to provide quick and easy access to the most updated labor market information available, right from the comfort of your Inbox!

If you would like to register for this free service, please e-mail nucci@dlt.state.ri.us with your request.

### Please let us know...

We value your comments and questions regarding this publication and all of LMI's data, products, and services.

Please let us know if **A Decade of Change** has met your workforce information needs and how we can improve on our efforts in the future:

Did you find this publication useful?

Did the data presented meet your labor market information needs?

What other types of data, products, or services would you like to see LMI release?

Please contact us (nucci@dlt.state.ri.us or 401-462-8429) with your thoughts and opinions!

#### Data sources

Quarterly Census of Employment & Wages. Industry and Occupational Projections Program.

Employment data for the New England states is taken from the U.S. Department of Labor, Bureau of Labor Statistics' Employment and Wages Annual Averages, 1992 (Bulletin 2433, October 1993) and from the Bureau of Labor Statistics web site (www.bls.gov/). Data for 2002 is preliminary and current as of October 2003.

Employment data included within this report is subject to revision and may not be additive due to rounding and excluded data. Some data (\*) has not been released due to Bureau of Labor Statistics or State agency disclosure standards.

Detailed coverage of Mining employment is not included within this report due to its limited size. In 1992, Rhode Island's private Mining employers reported 187 jobs. By 2002, this number had increased to 223 jobs statewide. Non-classified and Statewide employment is also not included, except where noted.

• This publication was written and designed by Nick Ucci, Principal Research Technician.
